can you believe the weather this summer?
it's **supposed to be** hot as hell **this time of year**
that's what summer **is all about**, right?
but it just **keeps changing**, it's **driving me nuts**
I wonder how long **it can last**

a friend of mine called **the other day**
and asked, **what's the weather like** over there?
he's been living in England **for a while** now
and **he's gotten used to** the rain and the wind
it's been windy over there **since** last week
but **at least** you know **what to expect**

I wish I could make plans for weekends
like, last year it was **as hot as** it should be
did anyone **hear me complain** then?
I mean, except my family and friends
anyway, this weather **stinks** and **I want it to end**
