

good intentions, awful english

dear theodor,

i had heard about a earthquake what destroyed your town

i was really shocked that it was so strong earthquake

with my wife we were very afraid of you until you didn't phone

in my opinion it had to be very horrible, I wish you were ok

you can live by us in case your house can't repaired

my family will do everything what we can for to help you

for example we will send you money not to beg

in newspapers it was written the catastrophe was very big

they wrote something about that it was the worst

well, a person never know what to wait, like it is told

good intentions, awful english (cont'd)

there came informations that no one of our friends died

but from some reason I had problems with that I didn't believe it

I'm still thinking of people which lost their relations

when I saw them in the news, I recognized they are in big shock

I'm interested how I can help, must I send money or clothes?

who does help you most now? and what do need the most people at all?

if I had sent money, will they really have been coming to you?

I don't matter to send money, it's okay for me

I'm used to help despite I would rather be on the place

so please give me to know what do you want that I will do

looking forward to read your answer.

your emanuel
